

Precepting Performance Improvement (PI) Program

Precepting Performance Improvement (PI) Program allows academic units (sponsors) to develop and oversee the completion of PI projects that meet ABFM Family Medicine Certification requirements. Approved sponsors are able to develop and oversee projects for teaching physicians without having to submit an application for each activity for ABFM review.

To participate in the Precepting Program, sponsors must attest to comply with ABFM requirements in three distinct areas: organizations, PI projects, and physician participation.

► Organizational Requirements

Sponsors participating in this program will be expected to meet the following requirements and responsibilities:

- **Portfolio Manager**
Identify a portfolio manager to oversee the program's portfolio, submit required reports, and physician completion results.
- **Track Physician Participation and Notify ABFM of Completion**
ABFM expects that sponsors will track teaching hours and notify ABFM in a timely manner when a physician has successfully completed the requirements and attested to his or her participation to ensure that PI credit is awarded.
- **Auditable Record-Keeping**
The sponsor must demonstrate effective mechanisms for ensuring that physicians who would receive PI credit have meaningfully participated in the PI project. This includes, but is not limited to, maintaining an auditable record-keeping system to track physician participation in the approved PI project.

▼ Meaningful Participation Requirements

To receive ABFM PI credit for the Precepting Program, the teaching physician must meaningfully participate:

1. Complete an attestation appropriate to the teaching physician's work setting.
2. Complete at least 180 1:1 contact hours.
3. Participate in implementing the chosen intervention(s) – the changes designed to improve the teaching process appropriate to the teaching physician's work setting.
4. Review project data – including the pre- and post-data from the medical student or resident – in accordance with the Sponsor's project plan.
5. Demonstrate active collaboration in the implementation of the project.

▶ Performance Improvement Requirements

The PI activity associated with the Precepting Program must meet the following requirements to be approved by the Sponsor for PI credit:

❑ Defined Project Aim and Intervention(s)

- An explicit aim for improvement that will benefit the teaching physician and the medical student or resident should be expressed in a statement that describes what will be improved, a desired goal, and a timeframe for achieving improvement. Interventions should be clearly defined to achieve the stated aim and may include relevant changes such as (but not limited to):
 - An online course(s), evidence-based reading, or in-person training to address a specific area of teaching performance
 - Implementation (through teaching of medical students or residents) of skills developed through course/training

❑ Include at Least One Improvement Cycle

ABFM requires a minimum of baseline measurement prior to implementing an intervention, a re-audit post-intervention, and a comparison of the two. Baseline and post-intervention data should be collected from both the educator and the learner.

Baseline data may include (but is not limited to):

- A self-evaluation of teaching skills performed by the teaching physician
- An assessment of the teaching physician by the Sponsor

Post-intervention data may include (but is not limited to):

- Follow-up assessment from medical student(s) or resident(s) and self-evaluation/reflection by the teaching physician
- Follow-up assessment of the teaching physician by the Sponsor

❑ Comply with the ABFM Industry Support Policy

The ABFM Industry Support Policy is available at theabfm.org/industrysupportpolicy
